### Travel Booked as ISN will be valid at XWA

A common question asked around town is: We plan on purchasing a ticket now for travel after October 10, 2019, do we need to wait for XWA to show up in the reservation system or can we book now under the ISN airport code? **The answer is, you can book future travel now under the ISN airport code and your reservation for travel after October 10, 2019 will be valid at XWA.** The airlines are working to update their reservation systems to reflect the change; however, ISN will not be eliminated from the system until after October 10<sup>th</sup>. To avoid confusion as to which code to use simply enter "Williston" in the airport search bar versus the airport code.

### Tenant Move Preparation

Tenants, are you looking ahead to moving day? Now is the time to look closely and eliminate items not moving to the new airport. We are planning document shredding service the week of August 12<sup>th</sup>. Review your files now in preparation for this event. The plan is to provide locked bins at the Operations building to afford on-site secure shredding and then disposal.

### Quick Fact:

The design and colors of the terrazzo floor throughout the terminal represent a cohesive design. The darker colors and curves on the first 40' of the terminal lobby represent the Missouri river bluffs and the lighter flowing colors beyond the bluffs and on the second floor symbolize the clouds above.

### 72 Days!

72 days or another way to look at it only 10 weeks remain before XWA commences operations. Concrete paving is progressing on schedule with deliveries of cement taking place. The runway is nearing completion along with the taxiway and commercial apron. In fact the first 150' of the apron nearest the terminal is complete, which allows delivery, installation, and testing of the 3 Passenger Boarding Bridges. The baggage belts and systems in baggage claim and baggage make-up areas are being installed along with the elevators and the City of Williston's only two escalators. There are over 300 people on the site each day working collectively to join the many projects together for an on-time October 10<sup>th</sup> opening. To those 300 plus men and women, we say thank you! Thank you for your perseverance. Remain focused and stay safe.

Rumor has it...ISN will remain available for GA air traffic after XWA opens.

**FALSE**

The start of operations at XWA on October 10<sup>th</sup> requires cessation of all operations at ISN. After October 10th, any aircraft remaining at ISN will require special FAA and City permissions to depart the airfield. Additionally, ISN NAVAIDS will be disabled and the runway permanently closed. See newsletter Issue 7 for more details.

### Airport Operational Readiness (AOR)

AOR projects focus not only on the construction of your new airport, but also on the technology, processes, and people inside. At Chrysalis Global Aviation it is our commitment to ensure the systems, processes, people, and assets are organized and fully prepared for opening day and beyond at the people's new Williston Basin International Airport.
